Professional Profile

Full-Stack Software Developer and IT Specialist experienced in designing and building modern web and mobile applications for businesses across multiple industries. Proficient in UI/UX design, database integration, backend development, and system implementation, with a track record of delivering enterprise platforms, CRM solutions, election campaign applications, digital business platforms, and workflow automation tools. Committed to developing secure, scalable, and intuitive software that drives efficiency and business growth.

Core Competencies

- Software & Mobile App Development (Flutter, .NET, C#)
- Web Development (WordPress, HTML, CSS, JavaScript)
- IT Support & Systems Maintenance
- Project Management & Team Leadership
- Data Management & Reporting
- Problem Solving(debugging) & Technical Support
- Microsoft Office & Productivity Tools

Professional Experience

IT Technician / Software Developer

Orange Business Solutions, Abuja — 2022 – Present

- Designed and developed Orange CRM, a powerful tool that helps businesses manage contacts, tasks, documents, SMS, and reports all in one place.
- Led the development of One Lifestyle NG Property App, a cross-platform solution featuring real-time booking, advanced search, integrated payments (Flutterwave & Paystack), and NFC-enabled smart door access control.
- Built and maintained responsive websites and mobile apps for clients, ensuring scalability and performance.
- Provided IT support, monitored systems, troubleshoot connection issues, and executed upgrades to improve stability.

Technical Officer

SignalT, Abuja — Nov 2019 – Jan 2020

- Analyzed departmental documents for appropriate distribution and filing.
- Supported the COO with daily operational functions, improving workflow efficiency.
- Collaborated with sales and marketing teams to devise PR campaigns and coordinate with advertising.

Supervisor Leader, IT Support

Chidoka Campaign, Anambra — Sep 2017 – Jan 2018

- Implemented new team onboarding program, reducing training time from 4 weeks to 2.
- Supervised a team of 10 employees, overseeing hiring, training, and professional development.
- Developed a streamlined employee evaluation process, resulting in performance improvements.
- Researched and updated campaign-related materials for staff and partners.

Selected Projects

Election Campaign & Voter Conversion Platform

Designed and developed a comprehensive political campaign platform that enables voter engagement, campaign management, volunteer coordination, analytics, and targeted voter conversion strategies. The platform streamlines campaign operations and improves outreach effectiveness.

Orange Business Solutions Website

Designed and developed the corporate website for Orange Business Solutions, showcasing the company's ICT solutions, renewable energy services, procurement, project management, and digital transformation capabilities. Optimized for responsiveness, performance, and SEO.

Digiwell Enterprise Trading Platform

Led the UI/UX design and implemented database integration for Digiwell, an enterprise platform built for commodity trading, logistics management, regulatory compliance, and digital asset tokenization within the oil, gas, and aviation fuel sectors. Designed intuitive user interfaces and integrated the application's database layer to ensure reliable data processing, system performance, and seamless user interactions across multiple business modules.

Orange CRM

Designed and developed an enterprise Customer Relationship Management (CRM) system featuring contact management, task tracking, document management, SMS integration, reporting dashboards, and workflow automation to improve business productivity.

✦ **One Lifestyle NG Property Platform**

Developed a cross-platform property management application featuring real-time property listings, secure online bookings, integrated payment processing, and NFC-enabled smart door access for seamless property management.

✦ **EnerPulse Mobile Ecosystem**

Built a cross-platform mobile ecosystem that delivers real-time fuel and gas prices, official and parallel foreign exchange (FX) rates, economic policy updates, interactive calculators, and market intelligence to support informed financial and energy-related decisions.

✦ **Business Automation Solutions**

Successfully designed and delivered multiple custom websites, web applications, and mobile applications for clients across various industries, focusing on business process automation, workflow optimization, digital transformation, and user-centered design.
